Structure of the EAGLE Network

THE EAGLE Network

EAGLE: Eco Activists for Governance and Law Enforcement, is a network of members across Africa, who are replicating effectively a program and operational model to undertake wildlife law enforcement, which is based on the LAGA-Cameroon model, trailed, practiced and tested since 2003. The EAGLE Network currently operates in nine African countries and keeps expanding.

The over-arching objective of the EAGLE Network is: *Developing civic activism and collaborating with governments and civil society to improve the application of national and international environmental legislation, through a program of activities: investigations, arrests, prosecutions and publicity. Through this, EAGLE aims to generate a strong deterrent against the illegal*

trade in wildlife, timber and related criminal activities, including corruption.
